AMX Series Magnetic Drive Pumps AMX 系列 磁力驅動泵浦

Specifications

Horizontal, single-stage, centrifugal pump

Magnetic drive, seal-less, close-coupled

Wetted Material: PP+GF, ETFE+CF

Power Range: 0.37 – 7.5 kW (0.5 to 10 hp)

Maximum Capacity: 80 m³/h

Maximum Head: 45 m

規格一覽表

臥式單段離心泵

直接耦合，磁力驅動，無軸封

接液材質：PP+GF，ETFE+CF

馬力範圍：0.37 – 7.5 kW (0.5 – 10 hp)

最大流量：80 m³/h

最高揚程：45 m

AMX-Series Pumps AMX 系列泵浦

AMX is a series of general purpose chemical resistant pumps made of engineering plastic materials. This series is designed to cover applications for a broad range of industries.

The AMX-Series pumps are magnetic-driven and seal-less, protecting against accidental exposure of potentially dangerous chemicals to the environment, and protecting pump operators from harm.

AMX 系列是工程塑膠材質，耐腐蝕的常用型泵浦，操作範圍符合廣泛的產業運用需求。

AMX 系列為磁力驅動泵浦構造，無軸封、零洩漏，能有效隔離危險性藥水，不僅使操作人員遠離藥水威脅，也盡到保護環境的義務。

How do magnetic drive pumps work? 磁力驅動泵浦操作原理

Magnetic pumps work by using a set of magnetic coupling to transfer the mechanical energy from the motor to the pump's impeller. A drive magnet is attached to the motor shaft. On the pump side, an inner magnet is attached to the pump impeller. The magnetic flux between the drive and inner magnets pass through the pump containment shell, forming the magnetic coupling. The magnetic coupling allows the pump to be hermetically sealed for leak-free operation.

磁力驅動泵浦是使用一組磁耦合器將動能從馬達傳送泵浦葉片。在馬達端，驅動磁鐵安裝在馬達軸心上。在泵浦端，內磁鐵與泵浦葉片相接。驅動磁鐵與內磁鐵的磁力線迴路穿透泵浦後蓋形成磁耦合器，達成泵浦無需軸封並能完全密封的運轉狀態。

Where can I use AMX-Series pumps? AMX 系列的運用領域

- Chemicals where leakage must be avoided, including corrosive, toxic, and strong oxidizing agents.
- Potentially flammable and explosive chemicals.
- Highly volatile chemicals harmful to the environment.
- Chemicals that react when exposed to atmosphere or chemicals that can degrade with atmospheric exposure.
- Chemicals that are very expensive.
- 絕對不能洩漏之化學藥液，譬如：腐蝕性、毒性以及強氧化劑
- 易燃或有爆炸可能性之化學藥液
- 對環境有害之高揮發性化學藥液
- 容易與空氣反應或暴露於空氣會造成裂解的化學藥液
- 昂貴之藥水

Limitations of AMX-Series pumps? AMX 泵浦的注意事項

- Should not be used for chemicals with large amounts of solids.
- Dry-running should be avoided.
- Cavitation should be avoided.
- Operating temperature
 - PP+GF material: 0 - 80 °C
 - ETFE+CF material: 0 - 95 °C
- 不可用於含有大量雜質液體
- 嚴禁空轉
- 避免空蝕
- 操作溫度範圍
 - PP+GF 材質：0 - 80 °C
 - ETFE+CF 材質：0 - 95 °C

Need something Different? 是否有其他需求？

AVF-Series Pumps

AVF-Series pumps are canned motor in construction. This series has most of the same benefits as the AMX-Series pumps. Here are some additional benefits:

Fully Plastic Exterior with IP66 protection IP66 防護等級全塑膠外殼

Protected from drips and splashes
保護泵浦不受噴濺藥水損壞

Inverter Driven for Process Control 變頻控制

Eliminate process wastes
消除製程浪費

Fan-less 無冷卻風扇

Quiet operation, suitable for clean room
超靜音運轉，適合無塵室

AVF 系列泵浦

AVF 系列泵浦為罐裝構造，不儘有 AMX 系列大多數的優點，還提供了以下的益處：

IE4 or IE5 Motor IE4/IE5 馬達

Energy and cost savings
節省能源及成本

Light Weight 重量輕

Easy to handle/maintain
容易拆裝、保養

Compact 體積小

Space saving
節省安裝空間、高坪效比

AME-Series Pumps

AME-Series pumps are designed for high purity chemicals and heavy-duty applications. Some of the benefits of the AME-Series are as follows:

One-piece Formed Lining 與金屬一體內襯

Vacuum resistant
結構具抗負壓操作設計

Armored 金屬外殼

Strong pressure containment
可耐高壓

Rigid Shaft Support 高剛性軸心支撐

Temperature up to 150 °C
耐溫高達 150 °C

AME 系列泵浦

AME 系列泵浦是專為高純淨度藥水及高負荷製程需求而設計，可為使用者帶來以下益處：

Large Capacity 大流量

Capacity up to 3,000 lpm (180 m³/h)
流量高達 3,000 lpm (180 m³/h)

High Head 高揚程

Head up to 72 m (60 Hz)
揚程高達 72 m (60 Hz)

Pure PFA-Lining 高純度 PFA 內襯

No process contamination
Ultimate Corrosion Resistance
高純淨度藥水
最佳耐腐蝕性

Standardized 標準化

ISO 2858, ISO 5199, ISO 15783

A. Maintenance-Free Pump Casing 無需保養泵殼

The flanges are socket welded to the pump casing, eliminating O-Rings, thus, requiring no maintenance. The flanges are adjustable to easily align with mating flanges for a secure and leak-free seal.

泵浦法蘭與泵前蓋套接為一體，去除了O形環，也省略了更換O形環的保養需求，配合可調整式的法蘭可輕鬆與配對法蘭對齊，實現安全無洩漏密封。

B. Pump-Protection Buffer System 泵浦緩衝保護

The unique buffer system absorbs shock generated during abnormal pump operation such as cavitation, protecting the pump from damage.

獨特的緩衝系統可吸收泵浦異常運轉時（如汽蝕）所產生的衝擊，防止泵浦受損。

C. High-Efficiency Impeller 高效率葉輪

Closed impeller precision designed to streamline flow dynamics, minimizing hydraulic loss and maximizing pump efficiency.

密閉式葉輪，結合最佳化流力設計，降低水力損失，提高泵浦效率。

F. Plastic Containment Shell 全塑料泵浦後蓋

The plastic containment shell does not generate any eddy current loss, therefore, no additional heating of the pumped chemical.

塑料後蓋無渦電流的產生，避免渦電流所產生的能量損失與對藥液加熱。

G. Magnetic Coupling 磁耦合器

Torque from the motor is transferred to the pump impeller through magnetic coupling. The seal-less design is leak-free and there is no seal maintenance necessary.

馬達扭矩透過磁耦合器傳動至泵浦葉輪，無軸封設計零洩漏，也減少保養、維修需求。

D. Force-Cooled Bearing System 軸承強制冷卻系統

Specially designed flow channels force circulation through the bearing system, rapidly dissipating heat to prevent damage to the pump under dry-run conditions.

獨特對流冷卻設計，可快速帶走熱量。泵浦空轉時，可提高抗損壞的能力。

E. Long-Service Gasket 長效密封墊片

Strengthened gasket seal specially designed for extended leak-free service. Greatly reduces the need to service the pump.

強化的密封墊片設計可延長零洩漏的使用壽命，大幅減少維護泵浦的需求。

H. Corrosion-Resistant Bracket and Base 抗腐蝕托架與底座

Ideal for corrosive and saline environments. Protects against accidental chemical drips. Engineered to provide structural strength and long service life.

適合酸性環境與高鹽含量的環境使用，其抗腐蝕特性可避免意外被滴落藥水所損壞，加強結構設計可延長使用壽命。

I. Standardized Motor 標準馬達

The pump bracket is designed to fit standard IEC motor frames. Easy to source a motor that conforms to regional standards. Closed-coupled design requires no shaft alignment.

泵浦托架尺寸可安裝標準 IEC 馬達框號，可採買符合顧客當地標準的馬達。直接耦合設計不需做對心校正。

Note : *

Standard material of bracket and base of AMX series is PP+GF. FC brackets and SUS304 base are be offered in accordance with customer's requirement.

* *

The AMX Series has a unique 2-piece flange design, the flange adaptor and adjustable flange. Since the flange itself is not a wetted part, we offer only PP+GF as material for the flange.

* * *

We offer only PP+GF as material for Pump casing assembly, Rear casing, Bracket, Front support, and Impeller, PP as material for Magnet capsule, and SUS304 as material for Base plate of 86G and 86J.

* * * *

1/2 and 1 hp pumps use Ferrite metals for the magnets.

備註 : *

AMX 系列托架及底座標準材質為 PP+GF，但可依客戶需求提供鑄鐵材質托架搭配不鏽鋼底座。

* *

AMX 系列泵浦法蘭結構為一獨特結構設計 (含連結件及活動法蘭)。因連結件是接液部件，活動法蘭為非接液部件，所以 AMX 系列活動法蘭標準材質均可為 PP+GF；但活動法蘭材質亦可依客戶需求選擇與泵殼本體相同的材質，詳情請洽協磁公司。

* * *

86G 及 86J 前蓋法蘭組、後蓋、托架、軸心支撐及葉片組僅提供 PP+GF 材質；包膠內輪僅提供 PP 材質；底座僅提供 SUS304 材質。

* * * *

1/2 及 1 hp 的磁體材質為鐵氧體。
